WHO WE ARE

Joun Al Iraq is a modern Iraqi general contracting and oilfield services company established to support Iraq's strategic growth across energy, infrastructure, marine, and industrial sectors. As a new-generation contractor, we combine technical capability with disciplined project governance to deliver solutions that meet the evolving needs of international operators, EPC contractors, and national entities across Iraq.

Unlike traditional legacy contractors, Joun Al Iraq is built on **modern engineering principles, robust governance, and internationally aligned project-delivery frameworks**. Our approach ensures that every client benefits from faster mobilisation, clearer reporting, enhanced quality assurance, and strong cost control from project inception through to handover.

We are positioned to undertake both **large-scale EPC works** and **agile, rapid-deployment civil and maintenance projects**, giving our clients the flexibility to rely on a single, trusted partner for a broad range of operational requirements.

Our company brings together **Iraqi expertise, international best practice, and a forward-leaning philosophy**—creating a contractor capable of delivering complex projects with reliability, discipline, and absolute commitment to safety.

At our core, we strive to support Iraq's continued development by delivering projects that demonstrate quality, long-term value, and unwavering integrity.

OUR MISSION & OUR VISION

OUR VISION

To become one of Iraq's most **trusted** and **forward-thinking general contractors**—delivering infrastructure and energy-sector projects that enhance national capability, strengthen local industry, and support long-term economic stability. We aspire to lead through innovation, responsible development, and meaningful local impact.

OUR MISSION

Our mission is to provide **reliable, innovative, and cost-effective engineering and contracting solutions**, delivered through modern management systems, world-class safety performance, and a culture of transparency and professionalism. We aim to exceed client expectations by maintaining disciplined project execution, technical excellence, and a long-term commitment to sustainability.

OUR VALUES

Our values underpin every decision we make and guide our commitment to clients and communities:

✓ **Integrity**

We operate ethically, transparently, and compliantly—building trusted relationships and protecting our clients' interests.

✓ **Precision**

We deliver engineering clarity, disciplined planning, and technical excellence across every work package.

✓ **Safety**

We uphold a rigorous zero-harm philosophy, applying proactive risk management and committed HSE leadership.

✓ **Innovation**

We embrace modern tools, efficient construction methodologies, and digital technologies to enhance performance.

✓ **Local Commitment**

We invest in the Iraqi workforce, suppliers, and communities—helping build national capability and long-term resilience.

HEALTH, SAFETY & ENVIRONMENTAL COMMITMENT

Safety is the foundation of every Joun Al Iraq project. We operate with the belief that all incidents are preventable and that disciplined HSE practice is essential to protecting our people, our clients, and the communities in which we work. Through proactive hazard identification, strict permit-to-work systems, and continuous workforce engagement, we ensure safe operations in all environments—from early civil works to complex activities within live oil and gas facilities.

Our HSE culture is built on **accountability, clear communication, and continuous improvement.** We invest in training, leadership visibility, and site-level reporting to maintain high awareness and predictable performance. Environmental stewardship is also a core priority, ensuring that our projects minimise impact, manage waste responsibly, and comply with all national and international regulations.

Our **HSE approach** includes:

- Worksite risk assessments
- Daily toolbox talks
- HSE-trained supervisors
- Emergency response planning
- Contractor and subcontractor oversight
- Environmental protection and waste management

These measures ensure that every task, team, and project phase is executed with discipline, safety, and environmental responsibility at the forefront.

OUR SERVICES

Joun Al Iraq provides integrated contracting and technical services across multiple sectors. Our work is delivered by experienced teams, supported by modern equipment, international best practice, and structured project-management systems.

General Contracting & Civil Works

Our civil engineering teams deliver small to large-scale construction projects with a focus on structural integrity, durability, and efficiency. Whether developing new infrastructure or enhancing existing facilities, we ensure strict adherence to engineering standards, safety protocols, and client specifications.

Services include:

- Full civil construction (industrial, commercial, residential)
- Concrete structures, foundations & piling
- Roadworks, bridges & drainage systems
- Water, sewerage & utility infrastructure
- Earthworks, grading & site preparation
- Boundary walls, access gates & perimeter systems
- Turnkey building construction

Oil & Gas Sector Support

We support Iraq's oil and gas industry across upstream, midstream, and downstream environments. Our teams are equipped for both greenfield development and brownfield modifications, ensuring efficient and safe execution in live operational environments.

Services include:

- Oilfield infrastructure & well-pad construction
- Flowline installation & tie-ins
- Pipeline corridor civil works
- Tank foundations & bund walls
- Mechanical & piping works
- Electrical & instrumentation works
- Modular building camps for rig sites
- Heavy equipment mobilisation & lifting services

Marine & Port Infrastructure Support

Joun Al Iraq provides specialised civil support to Iraq's vital port and marine infrastructure. We understand the unique technical, environmental, and operational demands of maritime environments and deliver construction solutions that meet international port-development standards.

Services include:

- Jetty repair & civil structural works
- Shoreline protection & revetment systems
- Marine terminal civil support works
- Container yard construction (interlock, asphalt, concrete)
- Operational building construction (control rooms, admin buildings, inspection halls)

Operational Support Services

Long-term asset performance relies on reliable maintenance and operational support. Joun Al Iraq provides clients with responsive, high-quality services that protect asset integrity and minimise downtime.

Services include:

- Long-term O&M support
- Asset integrity civil support
- Minor works & maintenance contracts
- Rapid-deployment repair teams
- Facility upgrades & refurbishments

Industrial & Energy Projects

We support the development and expansion of Iraq's industrial and power-generation sectors. Our multidisciplinary teams deliver complex civil, mechanical, and electrical packages, ensuring safe integration within wider operational systems.

Capabilities include:

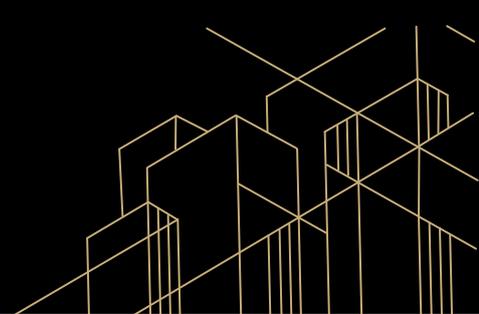

- Power plant civil and infrastructure works
- Substations & HV/LV infrastructure
- Mechanical installation & support works
- Cooling towers, pump stations, pipe racks
- Industrial facilities & warehouses

Logistics & Project Support

We offer integrated logistical and operational support that enables seamless project execution, even in challenging or remote environments. Our capability extends from materials handling to full life-support services for project sites.

Services include:

- Heavy transport & escorted movement
- Crane & lifting operations
- Fuel, water & material supply
- Warehousing & laydown solutions
- Camp setup, catering & life-support

SELECTED SERVICES FOR OIL & GAS CLIENTS

Joun Al Iraq provides a comprehensive suite of specialised services tailored to the needs of international operators, EPC contractors, and national oil companies working across Iraq's energy landscape. Our teams combine technical capability, disciplined project governance, and deep in-country knowledge to support safe, efficient, and compliant project delivery. Whether working on greenfield developments or complex brownfield environments, we bring a modern, solutions-oriented approach that enhances reliability and reduces operational risk.

Our selected oil & gas services include:

- **EPC support**
- **Brownfield modification works**
- **Rig site preparation**
- **Pipeline ROW clearing and access**
- **Jetty and terminal civil upgrades**
- **Storage tank civil packages**
- **Power plant infrastructure packages**
- **Control building construction**
- **Firewater system civil work**
- **Drainage and containment systems**

These services are delivered using structured management systems, strong HSE governance, and workforce models that ensure rapid mobilisation, controlled execution, and seamless integration with client operations.

OUR COMPETITIVE ADVANTAGE

Joun Al Iraq differentiates itself through a combination of agility, modern systems, and technical capability. While many contractors struggle with scale, bureaucracy, or outdated practices, we focus on flexible, efficient, and transparent execution.

Agile & Modern

We are structured for fast response times, efficient mobilisation, and clear decision-making—enabling clients to progress projects without unnecessary delays.

Multi-Sector Expertise

Our diversified portfolio allows us to support complex, multi-disciplinary infrastructure, energy, marine, and industrial projects.

Internationally Aligned Systems

Our work is guided by ISO-based management frameworks and supported by:

- Modern digital project reporting
- Transparent financial and operational governance
- Structured documentation control

Strong Iraqi Workforce

We invest in developing a capable, stable, and safety-conscious Iraqi workforce—reducing costs while enhancing local content and sustainability.

Risk-Aware, Safety-Driven

We apply disciplined HSE processes, including:

- Zero-harm mindset
- Project-specific risk registers
- Contractor and subcontractor HSE control
- This ensures every task is completed safely, responsibly, and in compliance with client and regulatory standards.

WHY CHOOSE JOUN AL IRAQ?

Clients choose Joun Al Iraq because we offer a modern contracting approach built on efficiency, disciplined delivery, and transparent communication. Our teams combine local knowledge with international technical capability, enabling us to execute complex projects safely, professionally, and cost-effectively.

We are committed to:

- ✓ Modern contracting approach—efficient, disciplined, transparent.
- ✓ Experienced technical teams with local and international backgrounds
- ✓ Strategic partnerships for specialised equipment and technologies
- ✓ Safety-led operations
- ✓ Cost-efficient mobilisation
- ✓ Genuine commitment to Iraq's development

OUR MANAGEMENT SYSTEMS

At Joun Al Iraq, our management systems are designed to ensure reliability, transparency, and disciplined project execution across every sector we serve. We operate through structured, auditable frameworks that align with internationally recognised standards, allowing us to deliver consistent quality and full compliance on all projects. Our commitment to operational excellence is reinforced through the following certifications:

- **ISO 9001 – Quality**
- **ISO 14001 – Environment**
- **ISO 45001 – Occupational Health & Safety**

To further enhance clarity, efficiency, and client oversight, we integrate a suite of modern digital tools that strengthen reporting, visibility, and real-time decision-making:

- Mobile field reporting
- Drone progress mapping (optional)
- Cloud documentation management
- Real-time client dashboards

Together, these systems enable accountability, streamlined workflows, and high-quality outcomes—ensuring every project is delivered with precision, safety, and performance at the forefront.

CONTACT DETAILS

Stronger Partnerships. Smarter Delivery.

For all enquiries, project discussions, or partnership opportunities, **Joun Al Iraq** welcomes you to connect with our team. Whether you require large-scale EPC execution, rapid-deployment civil works, or specialised oilfield services, we are here to provide clear guidance, timely responses, and tailored solutions aligned with international standards. Reach out today to discover how our modern, disciplined, and capability-led approach can support your operations and contribute to Iraq's strategic growth.
